

# ENGINE OIL

## LEVEL CHECK

Place the vehicle on level ground.

Start the engine and let it idle for 3 – 5 minutes.

If the air temperature is below 10°C (50°F), let the engine idle for an additional 5 minutes (a total of 8 – 10 minutes).

Stop the engine and wait 2 – 3 minutes.

Remove the oil filler cap/dipstick [1] and wipe it clean.

Check the oil level by inserting the oil filler cap/dipstick into the engine without screwing it in.

The engine contains a sufficient amount of oil if the oil level is between the upper level [2] and lower level [3] marks on the dipstick.

If the oil level is near or below the lower level mark, add the recommended engine oil to the upper level mark.

## RECOMMENDED ENGINE OIL:

**Pro Honda GN4 4-stroke oil (U.S.A. and Canada) or equivalent motorcycle oil**

**API service classification: SG or higher**

**(except oils labeled as energy conserving on the circular API service label)**

**JASO T 903 standard: MA**

**Viscosity: SAE 10W-30**

## NOTE:

- Other viscosities shown in the chart may be used when the average temperature in your riding area is within the indicated range.

Reinstall the oil filler cap/dipstick.
